

iSECUREtrac ***In-home Alcohol Testing***

Court Admissible Evidence

iSECUREtrac integrates visual client verification with In-home alcohol testing for conclusive and court admissible evidence of release compliance. An on-board camera utilizes infrared LED to enable accurate participant identification even in near darkness. The iSECUREtrac system detects breath alcohol levels within +/- 0.005% accuracy of actual blood alcohol levels.

Many agencies use In-home Breath Alcohol Testing in conjunction with other iSECUREtrac electronic monitoring systems (e.g., Active GPS, Passive GPS or House Arrest)

Alcohol Testing can be done on a fixed or random schedule or on-demand

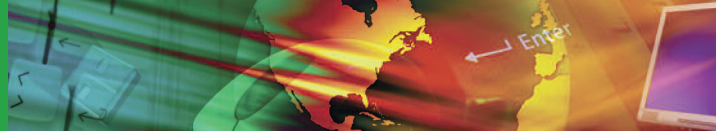

User-friendly Software

Built for easy access and usability, iSECUREtrac software is securely accessed 24/7 from most any Internet-ready device, anywhere in the world. In addition to current client location, movement and status, historical data can be leveraged to assist law enforcement in solving criminal investigations.

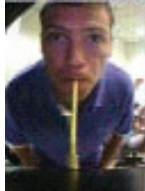

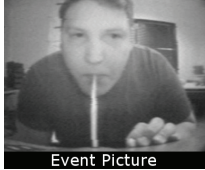

Supplemental Services

As a supplement to agency resources, iSECUREtrac provides a complete array of supplemental services including monitoring center intervention with direct offender contact to reduce agent work load and ensure program objectives are met.

In-home Breath Alcohol Monitoring

		MEMS 3000	MEMS 2000
MECHANICAL			
	Description	Enclosure houses an electro-chemical breath alcohol tester and a video telephone for participant identification	Enclosure houses an electro-chemical breath alcohol tester and a video telephone for participant identification
	Functional	Covered switches for easy cleaning and tamper resistance; filtered vents to prevent entrance of debris	Covered switches for easy cleaning and tamper resistance; filtered vents to prevent entrance of debris
	Case	UL approved; ABS flame retardant plastic	UL approved; ABS flame retardant plastic
	Size	10" x 10" x 8"	11" X 11" X 9.5"
	Weight	6.6 lbs.	7.0 lbs.
	Power	110VAC to 12VDC 4A	110VAC to 12 VDC 5A
	Memory	Up to 11,000 events	Up to 1,500 events
VISUAL VERIFICATION			 Event Picture
	Description	Provides ability to transmit full color still pictures over standard telephone line	Ability to transmit black & white still pictures over standard telephone line
	Functional	One button operation	One button operation
	Lighting	Strong flash for high quality even in dark rooms	Poorer performance in dark environments
TESTING	Functional	Performs self-diagnostics before each test, one button operation; no indication of test result to participant	Performs self-diagnostics before each test, one button operation; no indication of test result to participant
	Schedule	Scheduled or on-demand testing with automatic retesting; schedules stored in unit	Schedules stored in "server" which calls out to unit at predetermined times; server automatically recalls for required events
	Notification	"Smart" unit that decides whether an event must be immediately reported or stored for reporting at a later time	Unit calls server after every event
	Reporting	Entirely web-based scheduling and reporting; automatic reporting of violations via e-mail, fax, pager or SMS	Web-based scheduling; manual reporting to officers/agents via Monitoring Center via email, fax, pager or SMS
